

# HARD WORKING C/S WALLGLAZE IN GUERNSEY SCHOOLS

## Project Overview

The Guernsey Education Department has been using C/S Wallglaze Performance Coatings for approximately 20 years. Wallglaze systems have been applied in several schools across the island, in areas requiring high performance coatings, more durable than standard paint systems.

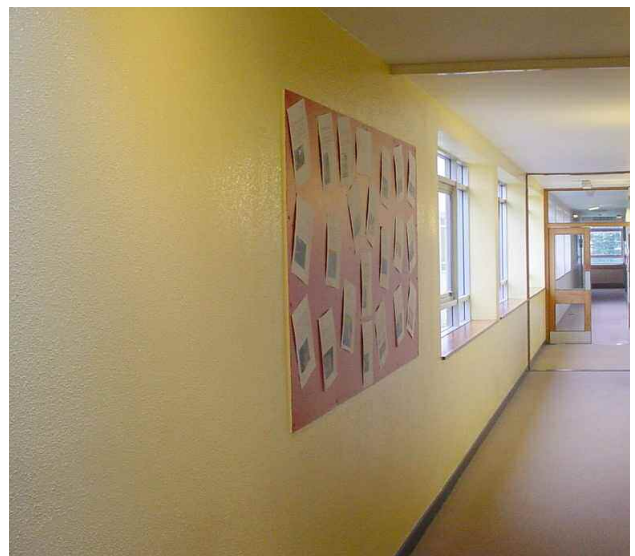

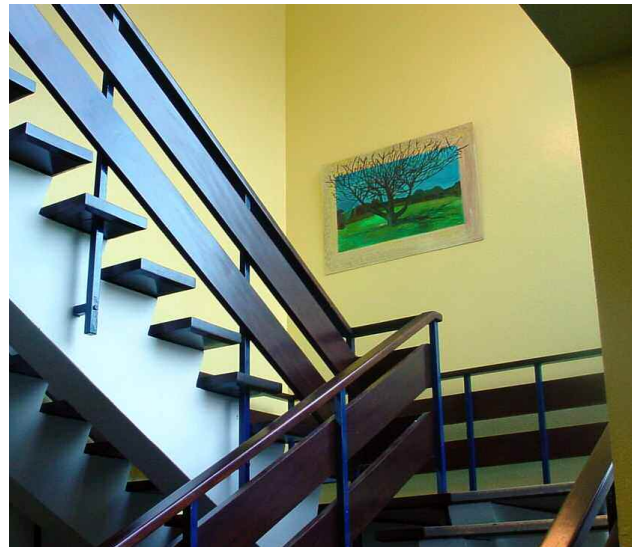

Wallglaze systems are ideal for areas where high wear and tear is prevalent. They provide an extended life, with excellent standard of hygiene, for the painted wall surfaces. The biostatic properties of Wallglaze ensure a surface free from harmful bacteria and fungi, which will last for many years with minimum maintenance.

“We have found the product to be very hard wearing and of excellent quality... easy to clean and wash down where required, to help keep our schools in good order, especially in heavy traffic areas, corridors and landings.”

“...I would personally recommend C/S Wallglaze products for all difficult areas where hygiene and cleanliness is of high importance.”

- Chris Dyer
