Partitions and Wall Lining Systems

CS Elimax Reform™

Partitions and Wall Lining Systems

CS Elimax Reform™ is an innovative partition and wall lining system that provides fast and clean delivery of custom interior spaces with integrated services. This adaptable interior wall solution is suitable for new build and redevelopment projects looking to expand the capacity of existing facilities and optimise space efficiency.

The system comprises a robust aluminium chassis lined with pre-finished clip-on panels, offering built in flexibility to meet changing local needs.

Designed and manufactured off-site to project specific dimensions and functional requirements, the system is delivered pre-cut, pre-finished and palletised for easy, clean and snag-free on-site assembly.

New interiors can be created quickly and efficiently without the need for multiple trades on site, and with minimal use of power tools, reducing time on site and health and safety risk.

In refurbishment situations, assembly work can be carried out with minimal disturbance to occupants and existing operations.

QUICK

CLEAN

SAFE

Quick, clean and safe to install, Elimax Reform™ also offers:

EASY MAINTENANCE

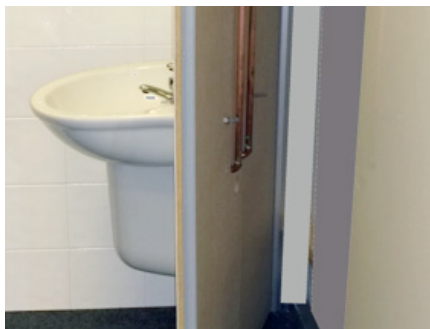

Individual panels are easily removed using a CS supplied tool, allowing access to services in the wall cavity, or replacement.

Refreshes of whole interiors can be carried out quickly, without the need for specialist contractors.

If your space needs to be reconfigured or repurposed, system components can be quickly dismantled and reused as required, saving time and money.

INTEGRATED SERVICES

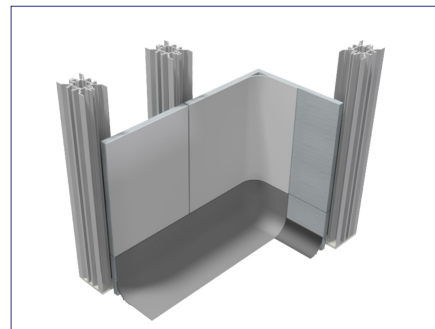

Elimax Reform interiors can be delivered pre-piped and pre-wired for easy connection to plumbing and electrics on site.

The system can also be configured to allow integration of necessary equipment.

This minimises the involvement of other trades during installation, speeding up the process and saving money.

FINISH OPTIONS

Elimax Reform is available in a standard or cleanroom finish, and substrates can vary to suit the project's functional requirements.

Panel faces can be pre-finished with any standard CS Acrovyn cladding option, or other bespoke finishes as required.

See the [Panel Options](#) section overleaf for more information.

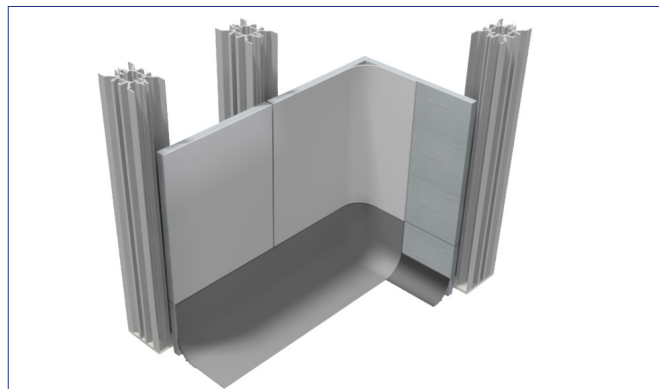

SYSTEM OPTIONS & COMPONENTS

STANDARD SYSTEM

The standard option is designed to suit most environments, offering configuration flexibility and selection of wall panel types & finishes, to meet functional and aesthetic requirements.

CLEANROOM SYSTEM

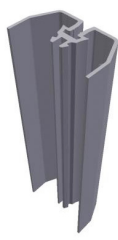

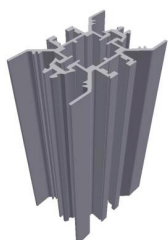

Our Cleanroom solution features a coved detail at wall-to-ceiling & floor-to-wall interfaces, joint options between wall panels (including hot welded joints) and smooth panel finishes to create a hygienic and easy to clean interior.

SYSTEM COMPONENTS

The robust system chassis is assembled using a small range of aluminium profiles. Wall panels are supplied cut to size, pre-finished, and fitted with continuous clip sections, to simply push into the chassis.

Panels can also include cut-outs in agreed positions, for easy connection to plumbing and electrics on site, or can be supplied pre-piped and pre-wired if required.

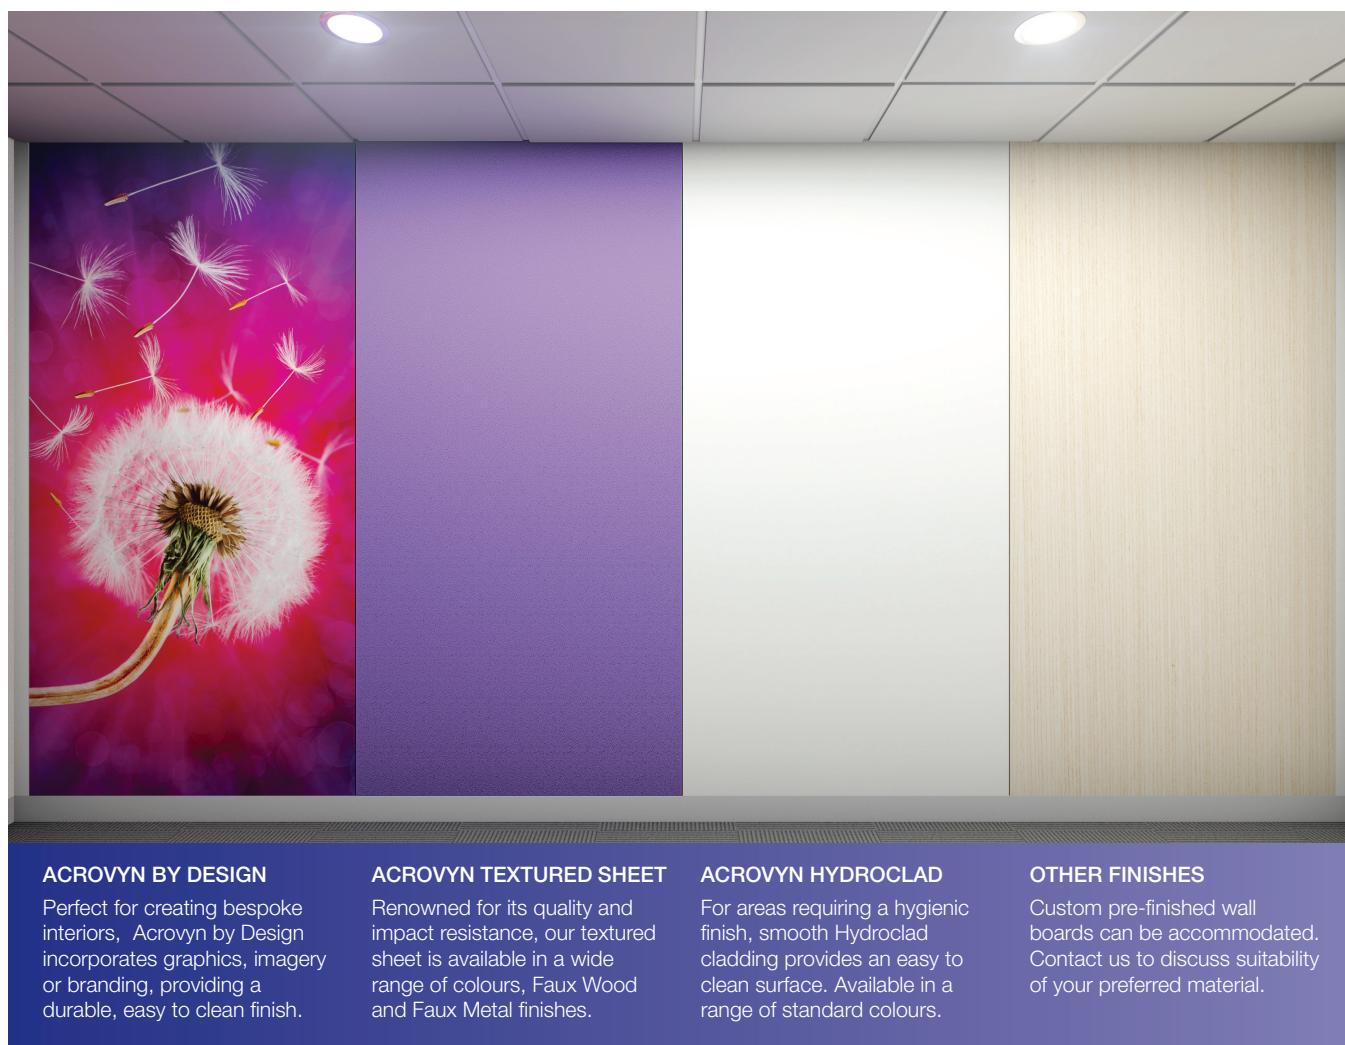

ELIMAX REFORM PANEL OPTIONS

Elimax Reform wall panels are available in a wide range of standard options, offering design freedom to create custom spaces.

Standard wall panel options include:

- 15mm thick MDF with a selection of standard facings, including Acrovyn by Design and Acrovyn Sheet (smooth or textured)
- 15mm thick melamine faced MDF

Other rigid substrates can be used as wall panels. Please contact us to discuss your requirements.

ACROVYN BY DESIGN

Perfect for creating bespoke interiors, Acrovyn by Design incorporates graphics, imagery or branding, providing a durable, easy to clean finish.

ACROVYN TEXTURED SHEET

Renowned for its quality and impact resistance, our textured sheet is available in a wide range of colours, Faux Wood and Faux Metal finishes.

ACROVYN HYDROCLAD

For areas requiring a hygienic finish, smooth Hydroclad cladding provides an easy to clean surface. Available in a range of standard colours.

OTHER FINISHES

Custom pre-finished wall boards can be accommodated. Contact us to discuss suitability of your preferred material.
